DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 50-51 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
2. In claim 50 at line 4, the phrase "the body adapted to be rotatably coupled to the first component" is unclear since it is not clear which "body" of the first or second component as being at lines 2-3 is being referred to.

Allowable Subject Matter

3. Claims 29-49, 52-54 are allowed.
4. Claims 50-51 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
5. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art discloses or suggests a cable guide for a fiber optic cable and a method for attaching a boot to a fiber optic cable; wherein, the cable guide comprising a body defining a passageway for receiving a fiber optic cable. A first end of the cable guide is rotatably coupled to a boot; a rotation key on the cable guide and/or a rotation control device on the boot limit the rotation of the cable guide with respect to the boot.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Walter et al. is further cited to show a strain relief system for fiber optic connectors.
